WERNERT-PUMPEN

**Vertical Chemical
Pump of Plastic
Material
Type VKPF or
VKKF 25-160**

The vertical chemical pumps of our types VKPF and VKKF are manufactured in series. They are specially suited for handling liquids which are chemically aggressive or contaminated with solids.

All parts in contact with the liquid are made of plastic material.

Our type VKPF is made of Polypropylene (PP) whereas type VKKF is manufactured from Polyvinylidene fluoride (PVDF). A maximum liquid temperature of 95 °C and 115 °C resp. is allowed depending on the selected type of plastic.

The shaft bearing is available in single or double bearing.
